DETAILED ACTION

This office action is in response to applicant's amendment filed on 02/17/2005.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 13, drawn to a system for processing sensor data and modeling the processed sensor data for virtual modeling, classified in class 345, subclass 501.
- II. Claims 14-15, 18 and 19-20, drawn to a component circuit testing, classified in class 324, subclass 500.
- III. Claims 16-17, drawn to a routing and interconnection software design by processing physical placement data, component location and order to generate virtual model of a physical board layout design, classified in class 716, subclass 12.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

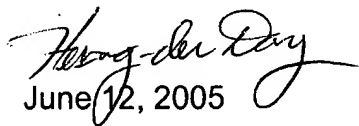

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
